

Eiger Australian Small Companies Fund

The Eiger Australian Small Companies Fund is an actively managed, style unaware portfolio of small to medium companies. The Eiger team follow a disciplined and proven investment management approach which seeks to identify quality companies that can deliver over the medium term.

Key features of the Fund

- ▲ **Diversified portfolio:** provides access to a portfolio of small to medium sized companies diversified across all sectors in Australia and New Zealand.
- ▲ **Experienced investment professionals:** access to a specialist investment team with over 60 years' combined experience investing in small to medium sized companies.
- ▲ **Robust investment process:** stringent research process driven by fundamental, in-depth and comprehensive analysis of a business's operations. This is applied practically in two ways; site and company visits (external research) and detailed financial modelling (internal research).
- ▲ **Access to growing companies and industries:** the small companies market is comprised of many fast-growing businesses that capitalise on changing industry dynamics and innovation.

How does the Fund work?

Investment philosophy

Eiger employs an active, fundamental approach to investing in smaller companies using a philosophy focused on price to intrinsic value.

Intrinsic value is calculated by discounting estimated future cashflow. Key drivers of cashflow are forecast revenue growth, operating margin and capital and working capital expenditure.

Discrepancies between the market price and estimated intrinsic value arise from market behaviour and differing fundamental estimates. This provides opportunities to outperform.

This opportunity is particularly pronounced in the less researched, small cap segment of the market.

The most common behavioural errors involve overreaction to short-term noise and under-reaction to structural change. Eiger's philosophy supports our ability to maintain discipline in the face of short-term noise and is forward looking so as to incorporate structural change and key trends.

Investment process

We follow a disciplined, repeatable five-step investment process, paying strong attention to risk management.

1. **Idea generation:** We utilise a quantitative screening tool combined with an intensive company meeting program (over 500 meetings annually) to determine a list of stocks for more in-depth analysis.
2. **Industry and company research:** We forecast future cash flows and employ our '9 Commandments' to assess a company's attractiveness.
3. **Eiger Valuation System:** The proprietary alpha score determines a price/value ranking for each company.
4. **Portfolio construction:** Construction of the portfolio is based on the alpha price/value ranking and a set of strict portfolio guidelines.
5. **Risk management:** Proprietary risk models determine the overall risk of the portfolio.

The result is a concentrated portfolio of 30-50 stocks that we believe provide the highest risk-adjusted valuation upside.

About Eiger

Eiger Capital is an active boutique Australian equities investment manager specialising in small companies. Eiger was founded in 2019 by Stephen Wood, Victor Gomes and David Haddad, who have worked together since 2011 and have over 60 years combined investment experience.

- ▲ We are conviction investors – our portfolios hold **our best ideas**
- ▲ We form long term views – by undertaking **detailed and robust company and industry work**
- ▲ We invest consistently – our experienced team uses a proprietary cash flow valuation and **our small cap 9 Commandments**
